

ColderFLOW

A HVAC EFFICIENCY SOLUTION

REDUCE YOUR ELECTRICITY CONSUMPTION, CO₂ CONTRIBUTION, AND ENERGY BILLS.

Remove
OIL FOULING

Improve
HEAT EXCHANGE

Produce
COLDER SUPPLY AIR

Increase
OIL LUBRICITY

What It Does:

ColderFLOW is a combination of three synthetic compounds that work together to improve the efficiency of HVAC systems.

How It Works:

ColderFLOW's synthetic compounds are blended together to offer the following savings:

EFFECT 1

Removes oil fouling on the interior refrigerant coil walls, improving heat transfer over 70%, allowing the system to work more efficiently.

EFFECT 2

Causes evaporation of the refrigerant to happen at a lower temperature, therefore, producing colder air faster.

EFFECT 3

Reduces the amount of friction on the entire system, thereby allowing the compressor to run smoother, which in turn increases the life of the compressor.

What It Really Means:

ColderFLOW increases the efficiency of air conditioning and refrigeration equipment by at least 10 percent. This system has been installed in over 2,500 buildings around North America with proven savings across the board. ColderFLOW comes with peace of mind as well.

What Now?

Request a HVAC evaluation from GGP Energy today to see not only how you can save money on energy, but also how your system can be more efficient with less maintenance and downtime.

SAMPLE ColderFLOW INSTALLATION SITES:

- Hotels
- Hospitals
- Commercial Office Buildings
- Manufacturing Plants
- Refrigerated Warehouses
- Restaurants
- ColderFLOW can work on most HVAC systems

ColderFLOW Installation

ColderFLOW is added in the refrigerant line of the existing cooling system or heat pump. You do not need to drain down the refrigerant in the system and normally you do not need to turn off the system. This installation requires a certified HVAC technician, and takes several minutes. If you have several cooling units, a technician can complete the installation of ColderFLOW in many units in a day.

ColderFLOW Insurance

In addition to coming with an extended warranty* with each ColderFLOW installation, we also provide a \$2 million dollar insurance policy on your system.

* Extended warranty on systems less than eight years old

Call us at **877.559.3666** today to find out if you qualify for **UTILITY REBATES** in your area.
